

Symptom Control Guidelines

PAIN

EXAMPLE (a)

Currently 360mg total daily dose (TDD) morphine

$\frac{1}{12} - \frac{1}{6}$ TDD = 30-60mg morphine

$\frac{30-60mg}{3}$ = 10-20mg diamorphine

Therefore

Breakthrough dose of diamorphine SC hourly prn is 10-20mg

EXAMPLE (b)

Currently 360mg total daily dose (TDD) morphine

$\frac{360mg}{3}$ = 120mg diamorphine over 24 hrs via SC infusion

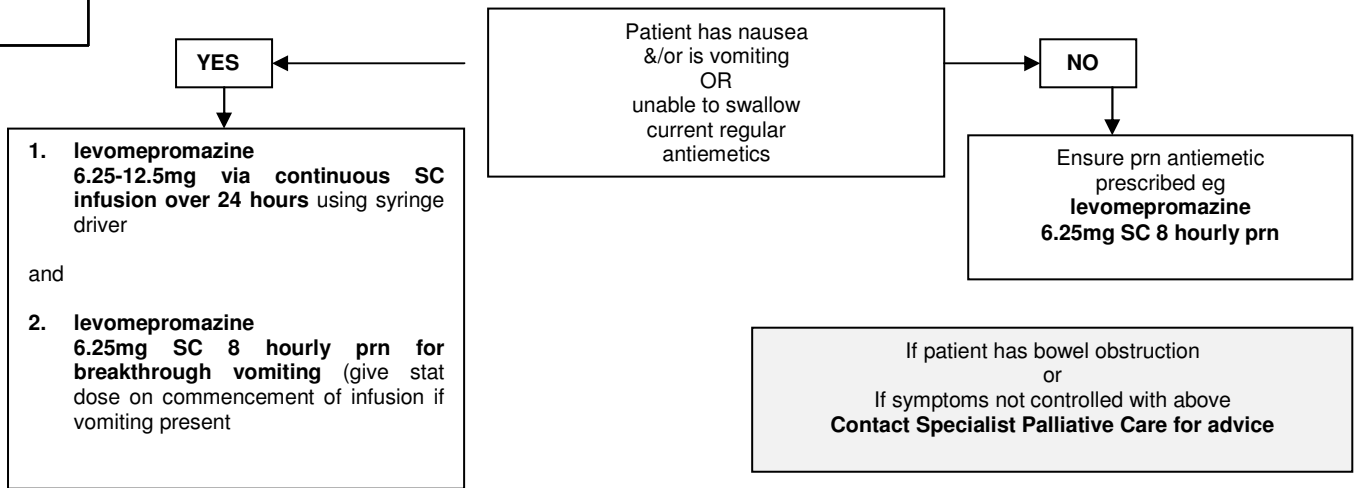

and

Breakthrough dose of diamorphine

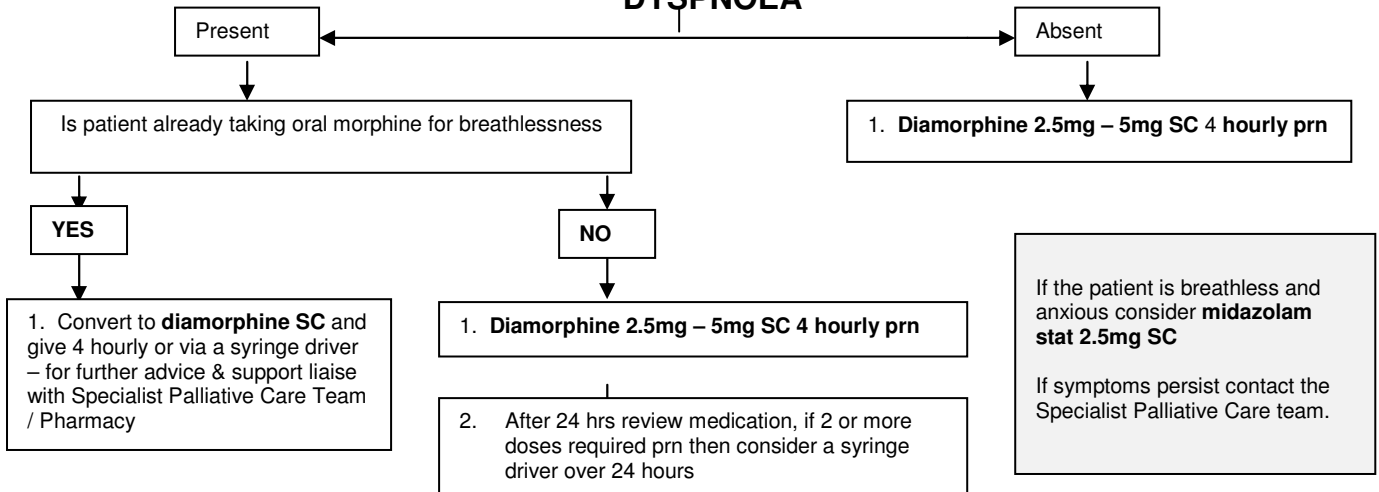

$\frac{1}{12} - \frac{1}{6}$ TDD = 10-20mg diamorphine to be given SC hourly prn.
